topic outlines

- WHO IS WERATEGOGS?
- relationship between the favourites and retweet counts in WeRateDogs page
- Most frequent dog name in weRateDog Page
- source for the most retweets in WeRateDogs Page

Who is WeRateDog?

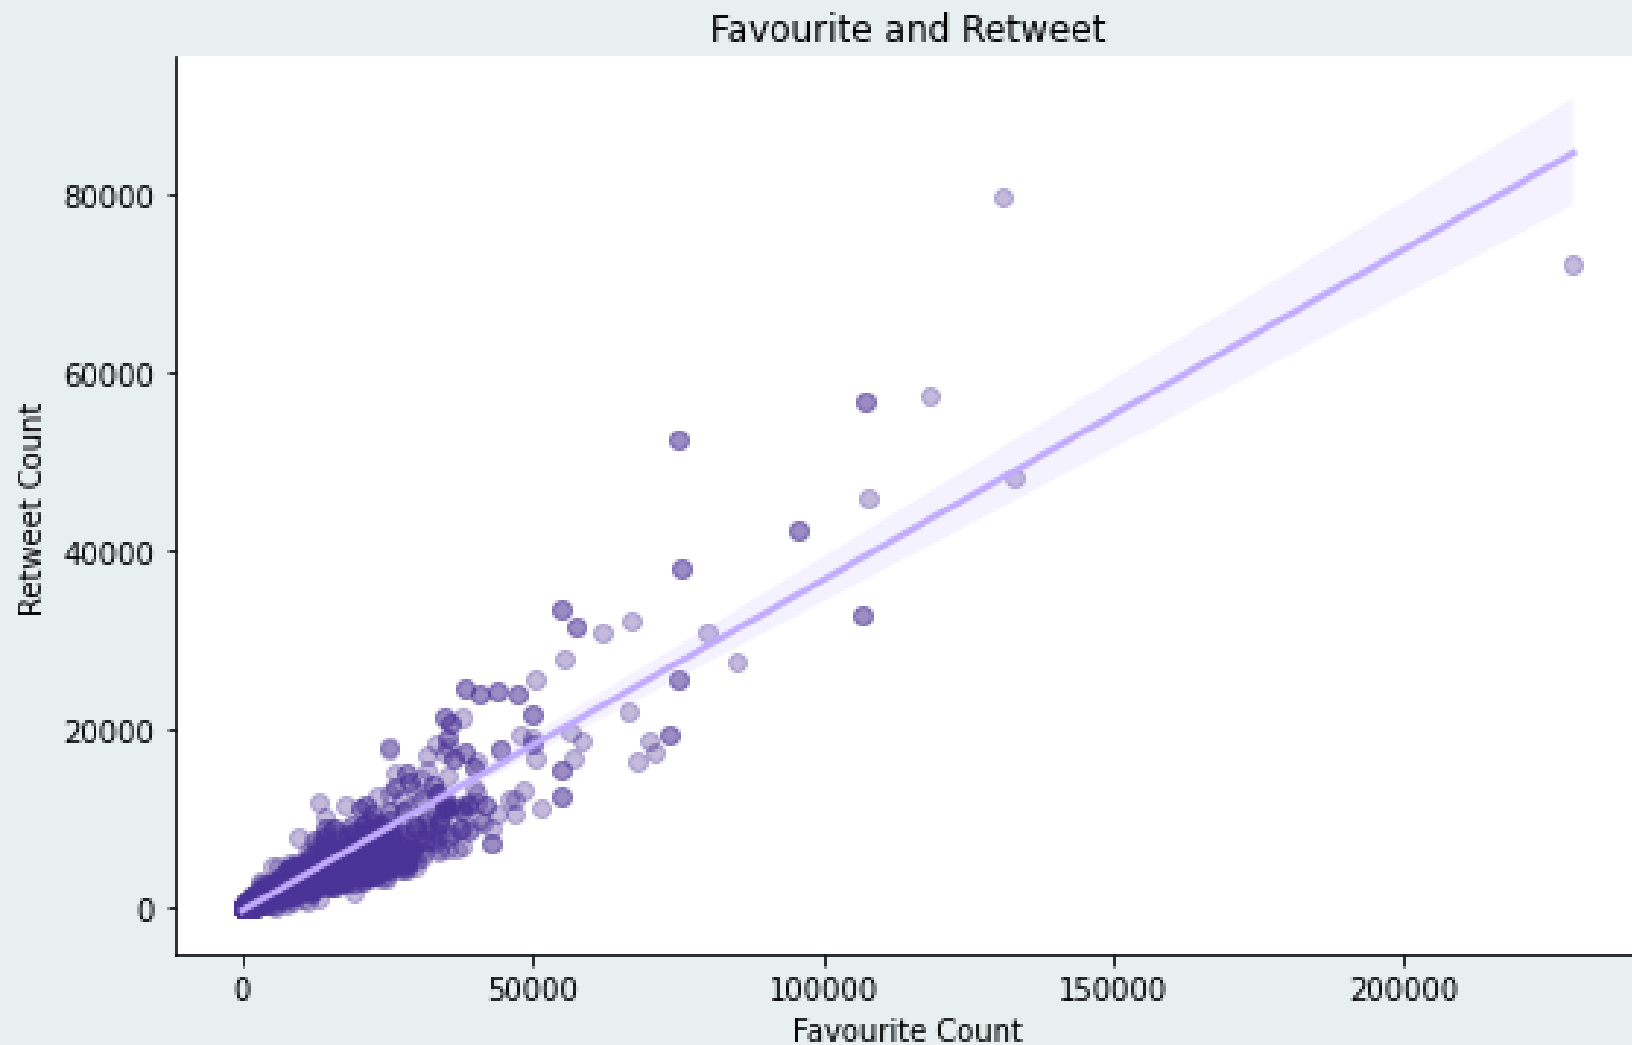

WeRateDogs is a Twitter account that rates people's dogs with a humorous comment about the dog. The account was started in 2015 by college student Matt Nelson, and has received international media attention both for its popularity and for the attention drawn to social media copyright law when it was suspended by Twitter for breaking these aforementioned laws.

Q1 | Is there a relationship between the favourite and retweet counts?

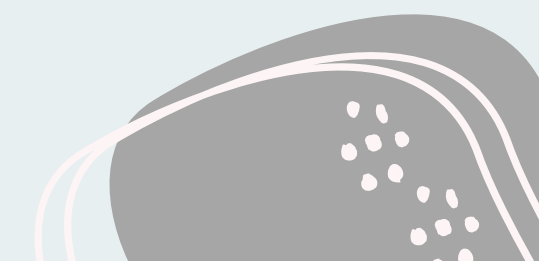

As shown in the plot, there is a relationship between favourite and retweet counts. There is actually a strong positive relationship, which means that the majority of twitter users like these types of tweets, and the majority of users will retweet them

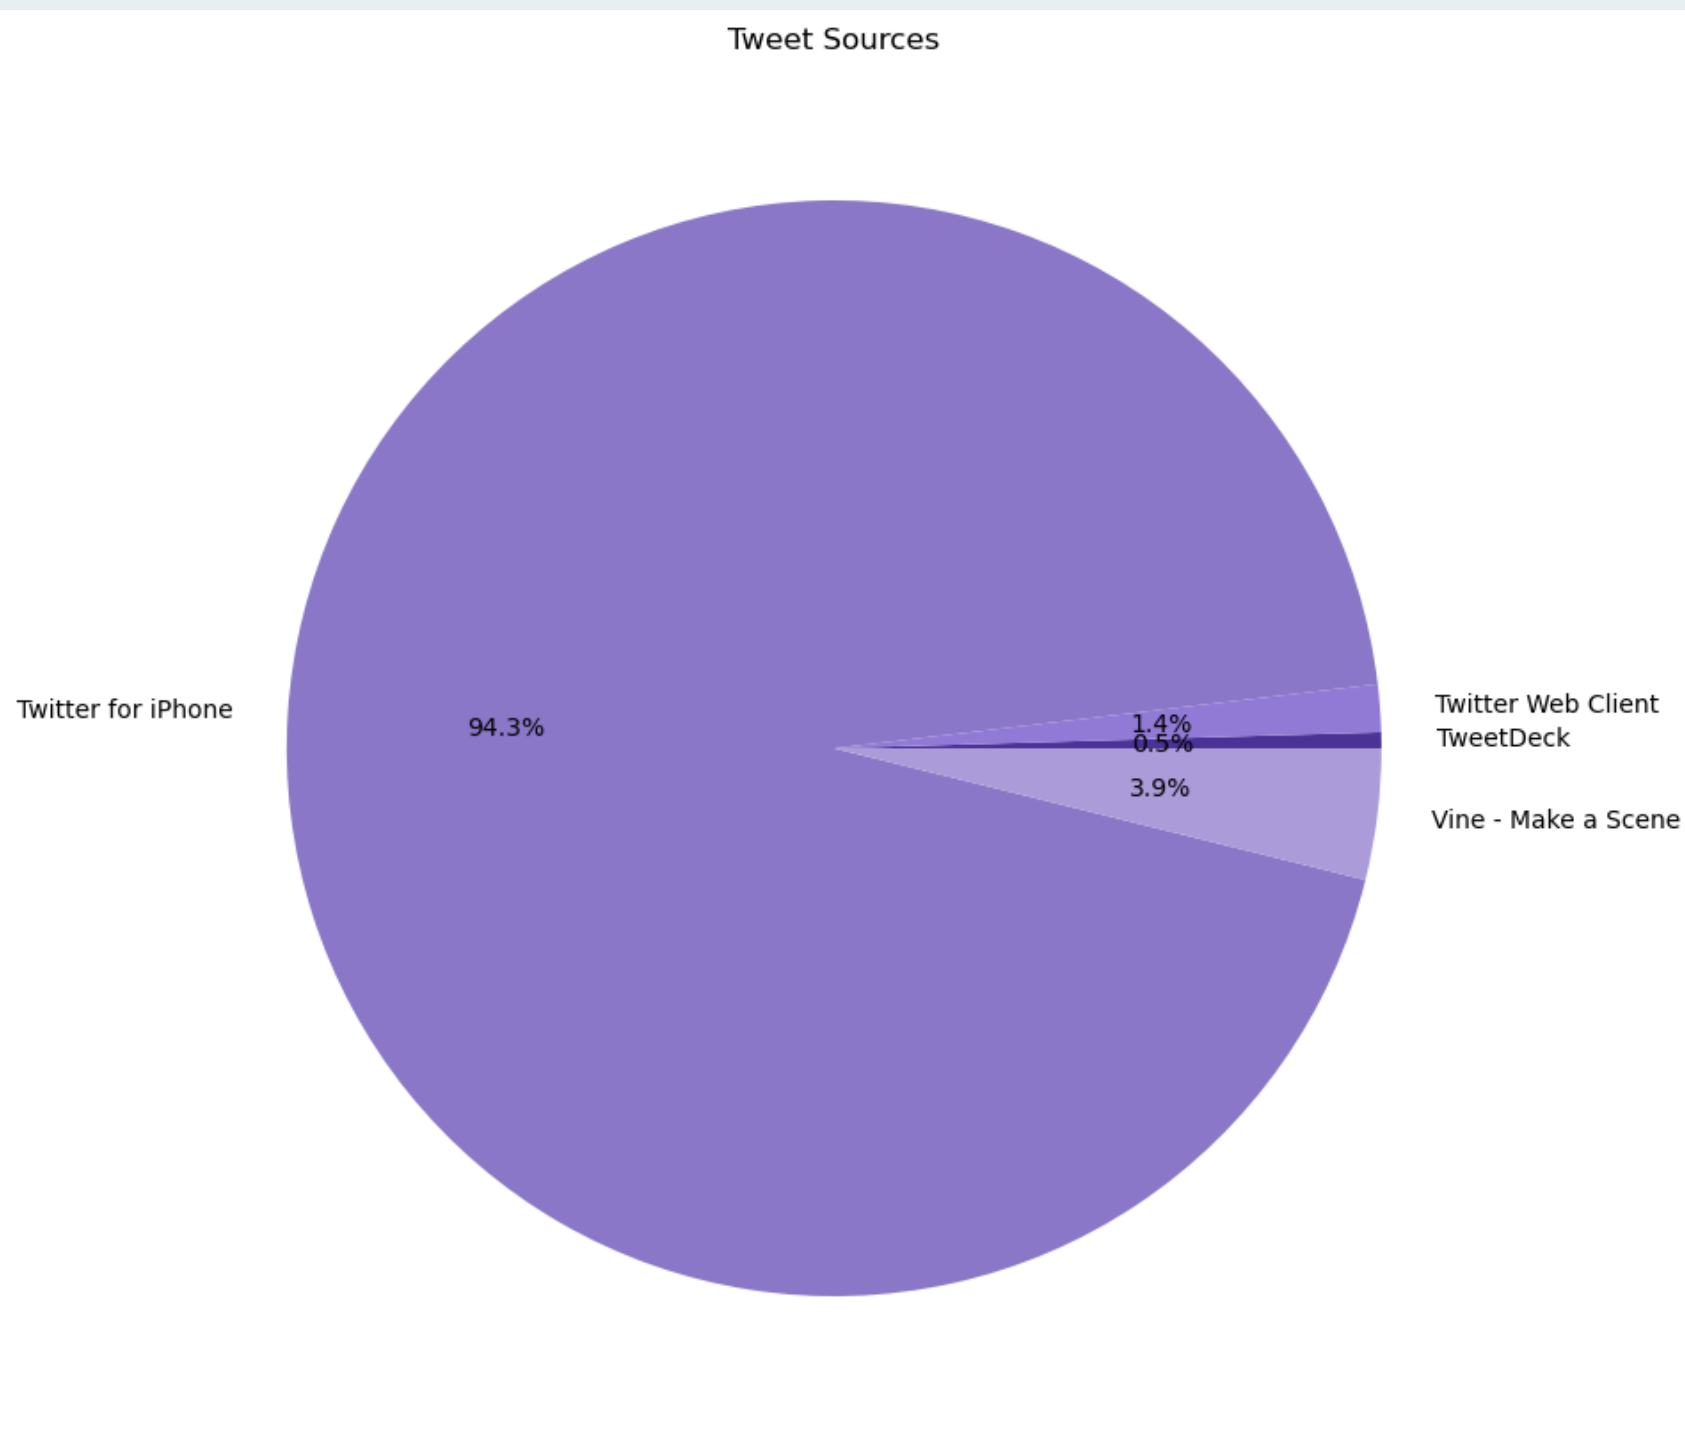

Q3 | WHICH DOG NAME IS MORE FREQUENT?

Considering it's impossible for a dog to be named 'A', I'm excluding it since it's just an article. Based on the graph, it is evident that Lucy, Charlie, and Cooper are the most frequently occurring names.

Q4 | What is the source for the most retweets?

The graph shows that most Twitter users use iPhones to retweet tweets.

The percentage of users who use iPhone is 94.3%.

The percentage of users who use Vine is 3.9%. The percentage of users who use Web client is 1.4% users who use TweetDeck is 0.5% and this is the smallest value.
